

ENVIRONMENT POLICY

At CC7, we are committed to conducting our Engineering, Procurement, and Construction (EPC) activities in an environmentally responsible and sustainable manner. We recognize our obligation to minimize environmental impact and protect the ecosystems in which we operate.

Our goal is to integrate environmental stewardship into every aspect of our operations and to continuously improve our environmental performance in alignment with legal obligations, client expectations, and global sustainability goals.

To fulfil commitment, we shall:

- **Comply** with all applicable environmental legislation, regulations, standards, and client requirements relevant to our operations.
- **Establish, implement, and maintain** an Environmental Management System (EMS) in line with ISO 14001 as part of our integrated management system, driving continuous environmental improvement.
- **Identify and assess environmental aspects and impacts** across all project phases and implement effective controls to prevent pollution and reduce waste, emissions, and resource consumption.
- **Promote efficient use of energy, water, and materials** by adopting innovative and sustainable practices throughout design, procurement, and construction activities.
- **Prevent environmental pollution** by ensuring safe handling, storage, and disposal of hazardous substances, and responding effectively to environmental incidents and emergencies.
- **Engage and train employees, contractors, and partners** to raise environmental awareness, build capability, and promote a shared culture of environmental responsibility.
- **Work collaboratively with clients, suppliers, and stakeholders** to promote environmentally sound practices and align project goals with sustainability objectives.
- **Monitor environmental performance** using measurable objectives, internal audits, inspections, and management reviews to drive continual improvement.
- **Support biodiversity and habitat conservation** wherever applicable, especially in sensitive ecological areas.
- **Incorporate climate change considerations** into project planning, design, and execution by reducing greenhouse gas emissions and enhancing climate resilience.

This policy is communicated to all persons working under the control of CC7 and is made available to the public and relevant stakeholders. It shall be reviewed periodically to ensure its continued suitability and effectiveness in supporting our environmental and strategic objectives.
