

# SUSTAINABILITY POLICY

At CC7, we are committed to conducting our Engineering, Procurement, and Construction (EPC) activities with a deep sense of responsibility toward sustainability. We acknowledge our role in shaping a sustainable future and recognize that long-term business success is linked to the well-being of the environment, society, and economy.

Our goal is to integrate sustainability principles into every aspect of our operations, driving value for our clients, communities, and stakeholders while minimizing our environmental footprint and promoting positive social impact.

To achieve this, we shall:

- **Integrate sustainability into project lifecycle management**, ensuring responsible planning, design, procurement, and construction practices that support environmental and social stewardship.
- **Comply** with all applicable sustainability-related laws, regulations, and standards, and align our practices with international frameworks, client expectations, and corporate sustainability goals.
- **Maintain and continuously improve** a Sustainability Management System (SMS) as part of our integrated management approach, with clear objectives and targets linked to environmental social, and economic indicators.
- **Promote resource efficiency** by reducing energy consumption, water use, and material waste, and by embracing circular economic principles wherever feasible.
- **Incorporate low-carbon and energy-efficient solutions** in our projects to support climate change mitigation and adaptation.
- **Engage with employees, contractors, and partners to foster awareness**, accountability, and collaboration on sustainability matters
- **Support ethical supply chain practices, fair labour conditions, and respect for human rights** across all operations and stakeholder engagements.
- **Monitor, report, and review sustainability performance** through internal audits, inspections, and management reviews to identify opportunities for improvement.

This policy is communicated to all persons working under the control of CC7 and is available to the public and all stakeholders. It shall be reviewed periodically to ensure its continued relevance, effectiveness, and alignment with our strategic sustainability objectives.
